THE ELECTROPOISE

(TRADE MARK.)
THE LIFE-WORK OF AN EDUCATED PHYSICIAN,
AN INSTRUMENT FOR THE
CURE OF DISEASE WITHOUT MEDICINE

Based on the latest theories of the cause and cure of disease, the Electro-Poise is a simple, safe, and effective instrument for the cure of all diseases without the use of medicine. It is not a toy, but a scientific instrument, and its use is a matter of course for all who are afflicted with any of the following diseases:

Chronic Catarrh of the Bladder, Gleet, Stricture, Hemorrhoids, Piles, and all other diseases of the urinary system. It is also a powerful agent in the treatment of all diseases of the bowels, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Stomach, Indigestion, Constipation, and all other diseases of the digestive system. It is also a powerful agent in the treatment of all diseases of the lungs, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Throat, Bronchitis, Asthma, and all other diseases of the respiratory system. It is also a powerful agent in the treatment of all diseases of the skin, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Nose, Hay Fever, and all other diseases of the mucous membranes. It is also a powerful agent in the treatment of all diseases of the nervous system, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Ear, Tinnitus, and all other diseases of the auditory system. It is also a powerful agent in the treatment of all diseases of the eyes, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Larynx, Hoarseness, and all other diseases of the vocal organs. It is also a powerful agent in the treatment of all diseases of the heart, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Uterus, Leucorrhoea, and all other diseases of the female system. It is also a powerful agent in the treatment of all diseases of the prostate gland, and is especially adapted for the cure of the following diseases:

Chronic Catarrh of the Seminal Vesicles, Gonorrhea, and all other diseases of the male system. It is also a powerful agent in the treatment of all diseases of the bladder, and is especially adapted for the cure of the following diseases:

WEALTHY WOMEN ON A SPIEE.
Two elegantly attired women were prisoners in the Jefferson Market Police Court yesterday charged with disorderly conduct.

According to the papers their names were Lucy Jones, 40 years old, who lived at the Barrett House, and Ellen Brown, 38 years old, of the Fifth Avenue Hotel. They were arraigned before Justice McMahon in his private room and discharged. A private carriage had been in waiting and they were driven rapidly away. Policeman McDonald, of the west Thirtieth street station, on Wednesday afternoon found Mrs. Jones and Mrs. Brown intoxicated at Thirtieth street and Sixth avenue. They were staggering along the avenue with their hats askew and arms linked. A large crowd followed them. The policeman placed them under arrest and escorted them to the station house.

There they threw themselves into each other's arms and wept. About two hours after the arrest Mr. Edgar Harriot, an agent of the Pennsylvania R. R. Co., called at the station house. He desired to have the women released and offered himself as bondsman. As he proved that he owned a valuable house on Vandam street, his bond was accepted and the women were liberated. Both names and addresses given by the women were fictitious. I learned, however, that they were wealthy women and members of well known families. They had touched at the home of "Mrs. Brown" with a young member of the Manhattan Athletic Club and had taken too much champagne. When the clubman left the house "Mrs. Jones" decided to return home, and the other woman consented to place her safety on board of a Sixth avenue horse car. "Mrs. Brown" lives a few blocks from that avenue, and by the time the couple arrived at the corner they were hardly able to dismount—a carriage from an elephant. They decided to walk up town and got along nicely until Policeman McDonald arrested them. They sent a messenger boy from the police station for the clubman, who in turn secured the aid of Mr. Harriot. I saw the latter at his residence Thursday afternoon, and he confirmed the story of how the women happened to take too much wine. He said "Mrs. Brown" is the wife of a wealthy railroad man and the mother of several children. "Mrs. Jones" is a widow, a well-known society woman and a member of an old family living on Fifth avenue, near Washington square. He refused to disclose their names.—N. Y. Herald.

A Railroad Across the Atlantic.
A railroad across the Atlantic is on the list of possibilities for future achievement of science. Many years ago a civil engineer read a paper before the French Academy suggesting a submarine railway. His theory was that at a certain depth of the ocean—a hundred fathoms or more—below any agitation from surface storms, the water is of such a density that nothing in tabular form, whatever the weight, can possibly sink. Having thus made a foundation in the very bowels of old Neptune, he proposed to sink a continuous line of immense iron tubes—after the manner of cable laying—in which a double track could be laid between Cape Clear, Ireland, and Cape Race, Newfoundland, and thus send trains booming through the tube to the consternation of the sea serpent and the mortal terror of the big and little fishes. The only serious objection to this learned academician could see to the successful termination of this wildest of all deep sea schemes was the suffocating effects of the smoke from engines used in his submarine railway tube; if this could be overcome, he said, then the grand oceanic railroad only required the necessary construction capital. In the light of present day science, when electricity is looked upon as the handiest as well as the most unique of all motive forces, why may we not reasonably expect the French Academy to demonstrate the practicability of their learned fellow's views? Then, again, the Koolhaas lacks only one turn of being a success, to say nothing of the perpetual motion machines now incubating in this and other cities of the United States. All of his scientific objections in regard to smoke having been overcome, let us call on the French to build their water-suspended oceanic railway in time for the great World's Fair in 1893. For downright "airiness" of conception this Atlantic railway scheme beats M. Verard's St. Anne's bridge across the English Channel all hollow, and for visionary notions commend us to a French savant every time.—St. Louis Republic.
